

# Gas Bill

Read Aloud Activity

Jenny is opening the mail. The gas bill came.

The bill is for \$115. That

is expensive. She wonders why the bill is high this month. She usually pays \$70 to \$85 a month for gas in the winter and \$40 to \$55 for gas in the summer.

Jenny and her family have a gas stove and a gas heater. It is December, so it is cold this time of year. They have been using the heater a lot.

How can Jenny and her family save money on their gas bill? They can wear sweaters, use more blankets at night, and put a rolled up rug in front of their doors to keep the cold air out.
