

# Veterinarian's Office

Read Aloud Activity

It is Saturday morning and Lupe is at the veterinarian's office. Her cat Benito is sick.

Benito stopped eating and drinking. He sleeps all day, and he doesn't play with his toys. He also sneezes and coughs a lot.

Dr. Niato is giving Benito a check-up. First, she listens to his heart with a stethoscope. Then she looks in his ears and down his throat. Finally, she takes his temperature.

Dr. Niato discovers that Benito has a respiratory infection. She prescribes an antibiotic for him. Benito needs to take his medicine twice a day for ten days.

Lupe thanks Dr. Niato for her help.
